Fact Sheet | 30th Jun 2026

Quorum Capital Balanced Portfolio (RG3aUK)

Strategy Description

The Quorum Capital Balanced Portfolio is designed for clients seeking long-term investment returns above cash and government bonds, who are willing to accept a moderate level of investment risk and understand that capital values can fall as well as rise. The portfolio seeks to prioritise capital growth, while retaining appropriate exposure to income-generating and lower-risk assets to support diversification and help manage overall portfolio volatility. It is managed within the RG3 Balanced risk profile and aims to remain within a maximum volatility threshold of 10%, monitored on both a monthly and annual basis.Portfolio volatility will fluctuate in response to market conditions. If volatility rises above the 10% threshold, the Investment Manager will seek to bring the portfolio back within the permitted range as soon as reasonably practicable, taking account of prevailing market conditions and client outcomes. The portfolio invests through qualifying funds selected from equities and fixed income asset classes.
