Fact Sheet | 30th Jun 2026

Quorum Capital Adventurous Portfolio (RG4aUK)

Strategy Description

The Quorum Capital Adventurous Portfolio is designed for clients seeking higher long-term capital growth, who are willing to accept a level of investment risk broadly comparable to global equity markets and understand that capital values can fall as well as rise. The portfolio significantly prioritises capital growth over income and capital preservation, while retaining some exposure to diversifying assets where appropriate to help manage overall portfolio risk. It is managed within the RG4 Adventurous risk profile and aims to remain within a maximum volatility threshold of 12.5%, monitored on both a monthly and annual basis. Portfolio volatility will fluctuate in response to market conditions. If volatility rises above the 12.5% threshold, the Investment Manager will seek to bring the portfolio back within the permitted range as soon as reasonably practicable, taking account of prevailing market conditions and client outcomes.

The portfolio invests through qualifying funds selected primarily from equity asset classes.
