

Quorum Capital Passive Balanced Portfolio (RG3pUK)

Strategy Description

The Quorum Capital Passive Balanced Portfolio is designed for clients seeking a low-cost, market-driven investment approach, with a higher allocation to equities than fixed income in pursuit of long-term capital growth. Investors should be willing to accept a moderate-to-higher level of investment risk and understand that capital values can fall as well as rise. The portfolio follows a strategic asset allocation approach, using index-tracking funds to gain broad market exposure while keeping underlying investment costs low. It is designed to reflect whole-of-market exposure across major asset classes, rather than short-term tactical positioning or active fund selection. The long-term strategic asset allocation is determined using historic return and risk data across a range of asset classes, including regional equity markets, global government bonds, corporate bonds, property securities and cash. The allocation is reviewed at least annually, with adjustments generally made annually to maintain alignment with the intended market exposure and the portfolio's risk profile. The portfolio seeks to provide long-term capital growth through a diversified allocation of approximately 80% equities and 20% fixed income.
