

Quorum Capital Ethical Income Portfolio (RGEIUK)

Strategy Description

The Quorum Capital Ethical Income Portfolio is designed for clients seeking a combination of long-term capital growth and regular income, while also wanting ethical and responsible investment considerations to be incorporated into fund selection. Investors should be willing to accept a moderate level of investment risk and understand that both capital values and income payments can fluctuate. The portfolio seeks to prioritise income generation and capital growth over capital preservation, while retaining appropriate diversification to help manage overall portfolio volatility. It is managed within a 10% maximum volatility threshold, monitored on both a monthly and annual basis. Portfolio volatility will fluctuate in response to market conditions. If volatility rises above the 10% threshold, the Investment Manager will seek to bring the portfolio back within the permitted range as soon as reasonably practicable, taking account of prevailing market conditions, income objectives, ethical investment considerations and client outcomes. The portfolio invests through qualifying funds selected from equities and fixed income asset classes, with fund selection drawn from the ethical universe available within each asset class.
